SUMMARY

Aspiring Product Manager with hands-on experience across ML, analytics, and full-stack development, building user-facing products from discovery to launch. Combines technical coursework (ML, statistical modeling, data pipelines) with product research, stakeholder management, and A/B testing to translate ambiguous problems into measurable outcomes.

EDUCATION

University of California, San Diego | *Expected Graduation: June 2027* | GPA: 3.7/4.0

B.S. Cognitive Science (Machine Learning & Neural Computation) | B.S. Business Economics | Minor: Business Analytics

Coursework: Data Science · Customer Analytics · Experiments in Firms (A/B Testing) · Innovation & Tech Strategy · Decision Making

SKILLS

- **Product Management & Research:** Requirements, Roadmapping, OKRs, A/B Testing, Stakeholder Management, User Research, Figma
 - **Programming & Data:** Python (Pandas, NumPy, SciPy, scikit-learn), SQL, PySpark, JavaScript, HTML/CSS, R, MATLAB, Git, Stata
 - **Data Science & Modeling:** Regression Modeling, Forecasting, Clustering, NLP/TF-IDF, Statistical Analysis
 - **Business & Reporting Tools:** Power BI, Advanced Excel (Automation, Dashboards, Pivot Tables), PowerPoint, Word
-

EXPERIENCE

LMA Marketing & Advertising | *San Diego, CA*

Aug 2026 – Present

Marketing & Project Management Intern

- Identified a recurring product gap in client reporting and drove the end-to-end solution: built the company's first client-reporting automation tool, reducing dataset cleaning time **98% (45 min → <1 min)** and shipping client-ready dashboards and decks.
- Translated Google Ads and LeadsRx performance data into actionable trends and client marketing strategy recommendations.
- Evaluated SEO, site traffic, navigation, and competitor websites to identify UX and content improvement opportunities.

Cornerstone Community Consultants | *San Diego, CA*

Jan 2026 – Present

Business Analytics Consultant Intern

- Leveraged Google Analytics and Squarespace data to identify user drop-off and engagement trends, informing redesign priorities.
- Conducted user testing on Figma prototypes, iterating page hierarchy and booking flows based on feedback.
- Led product redesign lifecycle, cutting site **24 → 8 pages (67%)** and streamlining the customer journey through launch.
- Delivered final client presentation, translating analytics, user research, and design decisions into recommendations for leadership.

Atkinson Behavioral Research Labs | *La Jolla, CA*

Jan 2025 – June 2025

Student Research Assistant

- Managed and validated research data operations for **300–400** weekly participants, keeping datasets clean and accurate.
 - Documented data pipelines and turned findings into structured reports for faculty and research teams.
-

PROJECTS

WatchTogether: Group Streaming Recommendation Platform | *Product Management & Full-Stack Development* | 2026

- Developing a group streaming platform that combines individual preferences into consensus-based recommendations.
- Defining product requirements, user flows, and success metrics for group matching, recommendations, and voting.

F1 Fantasy Points Predictor & Strategy Platform | *Full-Stack Product & Data Analytics* | 2026

- Built an end-to-end F1 web app combining **7+** performance signals to generate race forecasts and strategy insights.
- Engineered a Python/FastF1 pipeline refreshing race results, telemetry, and model inputs every **6 hours** on race weekends.
- Designed an interactive HTML/CSS/JavaScript front end translating predictive outputs into strategy insights for F1 fans.

Healthcare Spending & Outcomes Model (30+ Countries) | *Data Engineering & Statistical Modeling Project* | 2025

- Built a Python/SQL pipeline to clean, standardize, and integrate healthcare data across **30+** countries for statistical modeling.
- Developed regression models and automated visualizations to evaluate healthcare spending efficiency and communicate findings.

PantryPal: ML Recipe Recommender (TF-IDF + Clustering) | *Machine Learning & Data Pipeline Project* | 2025

- Built an ML recipe recommender using TF-IDF and clustering to generate personalized suggestions from user ingredients.
 - Engineered an end-to-end Python pipeline for preprocessing, feature extraction, recommendation generation, and evaluation.
-

LEADERSHIP

Women in Business UCSD: External Events Committee (2024–2025)

- Delivered a professional development conference for **150+** attendees by co-leading logistics, partnerships, and event workflows.

Marketing Director & Treasurer: Melody Connects (2021–2025)

- Raised **\$5,000+** for community programs and increased attendee turnout by **34%** by designing and executing fundraising campaigns.
